EDUCATION

National Skills University, Islamabad — **Islamabad, Pakistan**

BS (Information Engineering Technology) — *Graduation, June 2025*

- **Concentrations:** Software Development
- **GPA:** 3.63 /4.00
- **Related Coursework:** Software Engineering, Data Structures & Algorithms, Database Management System, Artificial Intelligence, Software Quality Assurance, Object-Oriented Programming, Operating Systems, Big Data Analytics, Cloud Computing.

EXPERIENCE

Terminus Technology PVT Limited — **Mustafa Town, Lahore**

Software Engineer — *Oct 2024 – Present*

- Designed and developed **full-stack solutions** across web applications, developing modules that improved operational efficiency, data accuracy, and user experience.
- Built and delivered the **Terminus Billing System**, a web-based solution for managing and generating monthly internet billing.
- Designed and implemented **RESTful APIs** using Java with PostgreSQL and Oracle, delivering robust backend solutions featuring authentication, role-based access control (RBAC), CRUD operations, and secure JSON workflows to ensure scalability, reliability, and high performance.
- **Collaborated with cross-functional teams** (HR, operations, and business stakeholders) to gather requirements, refine features, and deliver solutions that optimize workflows across business operations.

Ivy Interactive Solutions — **I9, Islamabad**

SQA Engineer — *Sep 2024 – Oct 2024*

- Executed **manual and automated testing** to validate functionality, usability, security and performance across web and mobile applications.
- Collaborated with **cross-functional teams** to gather requirements, report defects, and ensure timely resolutions.
- Performed **API, integration, and cross-browser/device testing** to ensure quality and consistent user experience.
- Created and managed **documentation**, including test plans, and detailed bug reports to optimize defect tracking and testing accuracy.

PROJECTS

Terminus Billing System

Web Application

- Developed and implemented the Billing Module in **Terminus Billing System** to streamline monthly internet billing and customer account management.
- Designed an interactive user interface featuring **dashboards**, **filters**, and **real-time status** updates for total, paid, pending, and overdue invoices
- Integrated key features including secure **payment verification**, dialog boxes, invoice count badges, search, filtering, and plan/package selection dropdowns.
- Built and integrated **RESTful APIs** (Oracle) to **support billing**, **invoicing**, and **payment** operations.
- **Optimized backend performance** through the implementation of sorting, caching, and error handling, enhancing system scalability and reliability.
- **Deployed the application on the server**, ensuring stable operation, accessibility, and ongoing maintenance in a production environment

Customer Registration & Complain Management Portal

Web App

- Developed interactive **web-based UI** screens for the Terminus Billing System's **Customer Registration Portal**, ensuring a seamless and user-friendly onboarding experience.
- Built registration form**s** with fields for **customer details, package selection**, and account credentials, along with secure login and signup functionality.
- Enabled **customers** to view and download previous month invoices directly from the portal.
- Implemented core backend functionalities including customer authentication, **complaint submission,** and status tracking to manage complaint records efficiently.
- Enabled customers to submit requests and **generate tickets for new internet** connections directly through the system.

Support & Maintenance (Terminus Billing System and CRM/Complaint Management)

- Deployed and maintained the applications on production servers, ensuring stable performance and availability.
- Provided ongoing technical support, troubleshooting issues, and resolving bugs to minimize downtime
- Monitored system health and performance, implementing optimizations for scalability and reliability.
- Managed database backups, updates, and recovery processes to safeguard customer and billing data.

SKILLS

Language: Java,SQL,JavaScript,NodeJs
Framework: Ajax, Spring MVC
Markup & Styling: HTML,CSS
Tools: Toad, Postman, Eclipse EE, VS Code
Databases: PostgreSQL, Oracle Database,
RESTful APIs: Development, Integration, JWT Authentication
Testing: Manual, Automation, Performance, Integration
